PROJECTS

FreeBreathing, eCommerce

JAN 2025 - MAR 2025   Live Link | GitHub Link

- Developed a full-stack e-commerce web app using **React.js, Bootstrap, Redux Toolkit, Node.js, Express.js, & MongoDB**, delivering seamless performance.

- Designed a fully responsive, mobile-first UI with **book search, author/genre filters, pagination** & **admin dashboard**, improving user navigation & experience.

- Implemented **JWT-based authentication** & **protected routes** to manage secure access for users & administrators. Integrated **Axios** & **React Router v6** for efficient API calls & smooth client-side routing.

- Enabled features like **add/remove books from cart & favorites**, **book ordering at zero cost**, & **personalized user profiles**. Added **loaders, alerts, and global state management** for better UI responsiveness & error handling.

- Built admin functionalities to **add, edit, or delete books**, **manage user orders**, and **handle book requests**, streamlining backend operations.

Tasque, Task Management

FEB 2025 - MAR 2025   Live Link | GitHub Link

- A full-stack task management app using **React.js, Tailwind CSS, React Router v6, Node.js, Express.js, MongoDB**, with secure **JWT-based authentication**.

- Enables users to **create, update, complete, & delete daily tasks**, helping manage personal goals efficiently.

- Supports **real-time task updates**, including toggling between completed & pending, & removing tasks once done.

- Implemented **protected routes** to restrict access to the Home page & other users' tasks unless authenticated.
